

Vyas Kirtan Dipakbhai

Gandhinagar, Gujarat

+91 9328909056 — kirtanvyas9916@gmail.com — LinkedIn — GitHub — Portfolio

Professional Summary

B.Tech CSE graduate and Jr. Software Developer at Softworld Infotech, building responsive, high-performance web applications with Next.js, React.js, and Tailwind CSS. Expertise in responsive design, API integration, state management, and user experience optimization. Shipped 5+ production MERN applications with Razorpay integration and real-time features.

Technical Skills

- **Languages:** JavaScript, TypeScript, Java, Python, C
- **Framework:** Next.js (full stack), React.js
- **Frontend:** Redux, Context API, Tailwind CSS, Bootstrap, DevExtreme
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, Firebase, SQL
- **Tools & Platforms:** Git, Postman, VS Code, Render, AWS, Cloudinary, Groq API, Canvas API, Razorpay

Education

Parul Institute of Technology (7.12 CGPA)
B.Tech in Computer Science Engineering

2022 – 2026
Vadodara, Gujarat

Professional Experience

Full Stack Developer Intern (MERN Stack Developer)
Unessa Foundation

January 2026 – May 2026
Vadodara, Gujarat

- Engineered a unified, atomic payment processing endpoint for Razorpay that eliminated a critical race condition, ensuring accurate, duplicate-free transaction records across 1,000+ donor transactions
- Built and maintained 15+ RESTful APIs, including a role-based Admin Panel with real-time infrastructure monitoring and a searchable donor management interface

Jr. Software Developer (Frontend Developer)
Softworld Infotech

July 2026 - present
Gandhinagar, Gujarat

Building responsive, production-ready frontend interfaces for client websites using Next.js, Bootstrap, and DevExtreme, translating design requirements into performant, cross-browser implementations

Projects

EduNexa – AI-Enhanced Learning Platform — React, Node.js, MongoDB, Razorpay, JWT

May-2025

- Built an AI-powered quiz engine (Groq API) that auto-unlocks after 90% video completion, with automated pass/fail scoring and retry logic, removing manual grading for instructors
- Implemented automated certificate generation via Canvas API, eliminating manual certificate creation for every course completion
- Implemented secure payment processing (Razorpay), Google OAuth login, and JWT-based role access across student and instructor dashboards, enabling controlled, paid access to course content

Talent Talk – Virtual Interview Platform — MERN Stack, Clerk Auth, stream.io

Nov-2025

- Built an end-to-end virtual interview platform with real-time video (stream.io) and Clerk authentication, incorporating anti-cheat mechanisms including copy-paste restriction and session activity tracking
- Architected the backend for horizontal scalability, supporting concurrent multi-user interview sessions

StockPilot – Inventory Management System — React, Node.js, MongoDB, JWT

Jan-2025

- Built interactive dashboards with data visualization components for real-time stock and sales tracking
- Designed and developed scalable RESTful APIs with Express.js and MongoDB to manage inventory and orders efficiently
- Established secure user permission system using JWT-based role management

Certifications

- **HackerRank Certified:** Frontend Developer (React), JavaScript, React.js, Java, Problem Solving

Achievements

- **Top 10 / 1000+ Teams** — PU Code Hackathon 3.0 (2025): Built VendorHub in 24 hours using React and Java
