Professional Summary

B.Tech CSE graduate and Jr. Software Developer at Softworld Infotech, building responsive, high-performance web applications with Next.js, React.js, and Tailwind CSS. Expertise in responsive design, API integration, state management, and user experience optimization. Shipped 5+ production MERN applications with Razorpay integration and real-time features.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Java
- **Frameworks:** Next.js (full stack), React.js
- **Frontend:** Redux, Context API, Tailwind CSS, Bootstrap, DevExtreme, React Hook Form, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, PostgreSQL, Firebase, SQL, Prisma ORM
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Vercel, Render, AWS, Cloudinary, Clerk, Razorpay, Groq API, Canvas API

Education

Parul Institute of Technology (7.12 CGPA) **2022 – 2026**
B.Tech in Computer Science Engineering *Vadodara, Gujarat*

Professional Experience

Full Stack Developer Intern (MERN Stack Developer) **January 2026 – May 2026**
Unessa Foundation *Vadodara, Gujarat*

- Engineered a unified, atomic payment processing endpoint for Razorpay that eliminated a critical race condition, ensuring accurate, duplicate-free transaction records across 1,000+ donor transactions
- Developed 15+ RESTful APIs, including a role-based Admin Panel with real-time infrastructure monitoring and a searchable donor management interface

Jr. Software Developer (Frontend Developer) **July 2026 - present**
Softworld Infotech *Gandhinagar, Gujarat*

- Developed responsive, production-ready frontend interfaces for client websites using Next.js, Bootstrap, and DevExtreme, translating design requirements into performant, cross-browser implementations
- Designed 30+ data-driven list and detail pages with DevExtreme DataGrid, column filters, and React Hook Form, integrating REST APIs and managing application state with Redux

Projects

EduNexa – AI-Enhanced Learning Platform — React, Node.js, MongoDB, Razorpay, JWT **May 2025**

- Built an AI-powered quiz engine (Groq API) that unlocks after 90% video completion, with instant pass/fail scoring and retry logic, removing manual grading for instructors
- Added certificate generation via Canvas API, eliminating manual certificate work for every course completion
- Integrated Razorpay payments, Google OAuth login, and JWT-based role access across student and instructor dashboards, enabling controlled, paid access to course content

Talent Talk – Virtual Interview Platform — MERN Stack, Clerk Auth, stream.io **Nov 2025**

- Launched an end-to-end virtual interview platform with real-time video (stream.io) and Clerk authentication, incorporating 2 anti-cheat mechanisms: copy-paste restriction and session activity tracking
- Architected the backend for horizontal scalability, supporting concurrent multi-user interview sessions

GantavyaSetu – Taxi Booking Platform — Next.js, TypeScript, Prisma, PostgreSQL, Clerk, Leaflet **Oct 2026**

- Built a full-stack ride-booking platform with Next.js, REST APIs, and Leaflet maps, supporting 3 vehicle types with distance-based fare estimates and coupon discounts
- Implemented live ride tracking with status polling and shareable tracking links, managing 7 ride states including cancellation, no-driver cases, and driver ratings

Certifications

- **HackerRank Certified:** Frontend Developer (React), JavaScript, React.js, Java, Problem Solving

Achievements

- **Top 10 / 1000+ Teams** — PU Code Hackathon 3.0 (2025): Built VendorHub in 24 hours using React and Java
